Mountain Weather Forecast

North Grampian

Including North and West Cairngorms National Park, Monadhliath, Ben Alder, Creag Meagaidh, Loch Ericht and Loch Rannoch
Forecast valid from 06:00 on Friday 16 Oct 2020 until 23:59 on Saturday 17 Oct 2020

Forecast Issued on Friday 16 Oct 2020 at 02:44 by Met Office Aberdeen

Confidence: Some uncertainty over extent of cloud cover over the next few days, with likely more than indicated on site specific forecasts. High for a more changeable spell next week but with large uncertainty for the details.

Headline for Friday 16 Oct 2020: Dull and occasionally drizzly in the north. Brighter, drier in south. Cold.

Forecast for Friday 16 Oct 2020

Weather: East or northeast winds will bring largely continuous cloud cover from the Moray Firth with little change in cloud distribution expected through the day. A few spells of light rain or drizzle likely, especially across the northern foothills and through evening as cloud thickens and lowers further.

Chance of cloud free mountain/hill tops above 800m: 50% for Creag Meagaidh and Ben Alder areas, these afforded some shelter, otherwise 10% chance with cloud generally extensive and persistent above 400-600m.

Visibility: Rather dull under low cloud and drizzle with fog conditions above modest heights. Much improved across the south and west with cloud more broken and at greater height.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Feeling cold especially under more extensive cloud cover in the north. Be aware of poor visibility at height.

Forecast for Saturday 17 Oct 2020
Weather: A similar day to Friday with cloud cover generally extensive across most ranges and the best of the brightness across the south. Cloud will bring a few drizzly showers, especially in the north, these wintry at Munro level.

Maximum wind: North or northeast 10-20mph.

Chance of cloud free mountain/hill tops above 800m: 20% north, 40% south. Cloud rather persistent above 400-600m.

Visibility: Very limited at height in the north due to hill fog and drizzle, but improved on lower slopes and likely staying good across the west where skies remain clearer.

Temperature: **Glens:** 3-6C rising 7-9C.
At 800m: 1-2C.
Freezing level: 1200m.
